I urge you to reject the NAB's petition 04-160!

I am a truck driver and rely very heavily on the weather & traffic conditions on my XM radio. When you're driving down the highway & going through many towns & cities that are not familiar to you, the capabilities of XM broadcasts are of extreme importance! Many cities such as Chicago refer to the interstates and local routes by their city nicknames such as the "Skyway" - me being from out of town driving down the road would have no idea what the Skyway is.

Also XM is a service I pay for!! The public does not pay for regular radio. Too many freedoms are being taken away from the people!

PLEASE REJECT 04-160
